

In an effort to maintain social distancing and decrease the potential spread of COVID-19 Arlington Animal Hospital is taking the following precautions:

- All vaccine clinic clients will be asked to wait in their vehicle and will be texted or called when it is their turn to be seen. This is the safest way to vaccinate animals and minimize client contact in comparison to making appointments.
- The lobby, exam rooms and all “high-touch” surfaces such as door handles, light switches, telephones, keyboards and other surfaces that are touched frequently will be disinfected throughout the day.
- Clients please bring only necessary family members with their pet, preferable only a single client.
- After checking in at reception, clients will be asked to wait in their vehicle or outside if the lobby starts to become crowded and social distancing cannot be accomplished. Clients will be texted or called when it is their turn to be seen.
- Clients please pay online when possible so you can enter and leave the hospital on a quicker basis or products can be brought outside to you.
- Clients that display respiratory symptoms must have their animal examined in the treatment area. Direct contact with the client should be avoided and communication be accomplished telephone or from a far distance.

Thank you for your patience during this time. Our focus is on the safety of our clients, patients and employees. Updates and changes will be communicated as they become available.
